What's New in Flare 2018 and MadCap Central

- Side Navigation Output
- Elasticsearch
- Analyzer Included
- New Cloud-based Review Workflow with MadCap Central – YAY!!
- Host Mapping/CNAME
- Other Features/Usability Improvements for Flare

WHAT IS MADCAP CENTRAL?

MadCap Central is a cloud-based platform that lets you plan, track, and manage processes, content, and teams that are responsible for producing documentation.

- Source Control
- Task Management
- Browser-based Collaboration and Review Workflow
- Build Management
- Hosting

CLOUD-BASED REVIEW - BENEFITS

- No need to download and install any desktop software!
- Multi-user editing
- Review-only interface
- Auto-save and tracking

HOST MAPPING

This example is from godaddy.com. First, we selected **CNAME** as the type.

In the **Host** field, we typed help, our subdomain.

And finally, we pointed the CNAME to **madcloudapi.azurewebsites.net**.

The image shows a configuration form for host mapping. It has four fields: 'Type', 'Host', 'Points to', and 'TTL'. Each field has a callout box pointing to it. The 'Type' field is set to 'CNAME', 'Host' is 'help', 'Points to' is 'madcloudapi.azurewebsites.net', and 'TTL' is '1 Hour'. There are 'Save' and 'Cancel' buttons at the bottom right.

Type *	Host *	Points to *
CNAME	help	madcloudapi.azurewebsites.net
TTL *		
1 Hour		

Save Cancel

OTHER IMPROVEMENTS

- Sharepoint 2016 and 365 support
- Microsoft TFS 2018 support
- Salesforce Connect enhancements
- Find and Replace enhancements
