software

# Product Overview

Cutting-edge software solutions designed to support the entire content development lifecycle, backed by world-class service and technical support.

Providing secure password-protected access for viewers and SMEs to our Flare-generated content hosted on MadCap Central has been a game changer for us. We are now more efficient and self-reliant as a team, eliminating dependencies on our internal IT departments.

**PATRICK FUELDNER** | Tech Lead – Technology Learning Center at Nestlé Information Technology

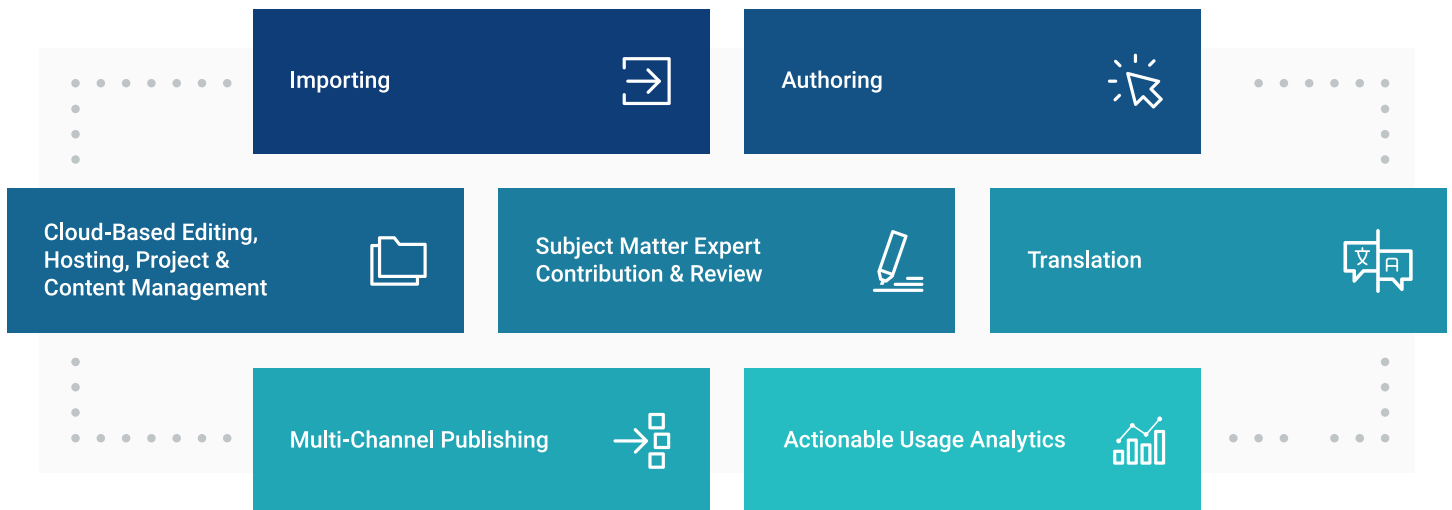

# MadCap Authoring and Management System

## A Complete Solution Supporting the Entire Content Development Lifecycle

The MadCap Authoring and Management System (AMS) combines the power and security of on-premises authoring with the convenience of the cloud to provide a complete solution for content developers. From authoring, publishing, and translation to cloud-based content management, streamline the entire content development lifecycle with MadCap Software.

## Why MadCap Flare?

Single-source authoring and publishing streamlines content delivery, reduces costs and ensures your end users have access to the information they need, on any device, language, or format.

[LEARN MORE →](#)

There is simply no better solution than MadCap Flare if you need multiple output formats, content conditioning, single-sourcing, source control integration, or context-sensitive help, all in an easy-to-use package. It doesn't get any better than this.

**MIKE KELLEY** | Principal Information Developer, inContact

## Single Source Content Development

### WHAT?

Single-sourcing is the practice of re-using common content throughout your documentation deliverables.

### WHY?

- » Cut project time
- » Increase productivity
- » Reduce possibility for error
- » Lower localization costs
- » Streamline content delivery
- » Improve consistency and content accuracy
- » Shorten ongoing content maintenance cycles

Increase  
Productivity

Reduce  
Project Time

Lower  
Localization Costs

Streamline  
Content Delivery

# Multi-Channel Publishing

## WHAT?

Multi-channel publishing allows you to publish your content to many different output formats, all from a single Flare project.

### Import Legacy Content

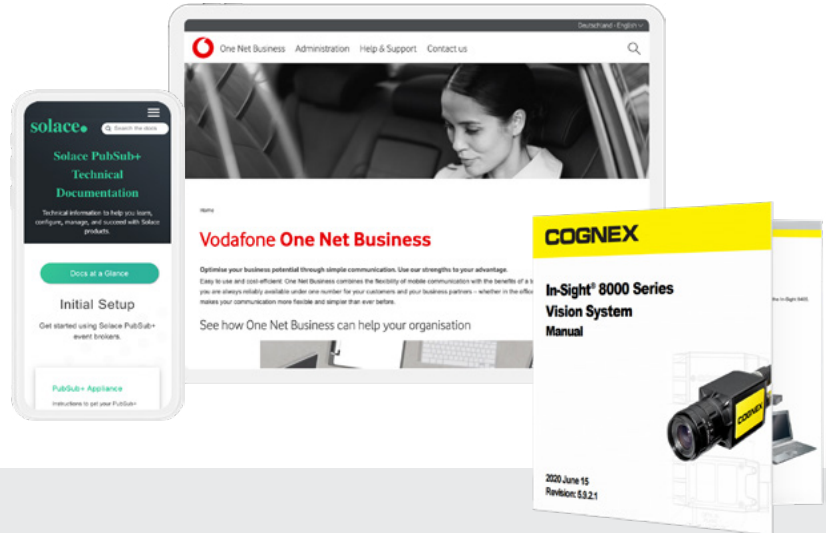

- » Microsoft® Word™
- » Microsoft® Excel
- » Adobe® FrameMaker®
- » Adobe® RoboHelp®
- » HTML
- » XHTML
- » CHM
- » DITA
- » Author-It®
- » Other Help Projects

### Output Types

- » Responsive HTML5
- » PDF
- » Microsoft® Word™
- » Clean XHTML
- » DITA
- » Eclipse Help
- » EPUB
- » HTML Help
- » WebHelp
- » WebHelp Plus
- » CHM

## WHY?

Deliver multiple format types to your end users at very little incremental cost, while streamlining content delivery.

MadCap Flare is the most versatile tool I've used in more than 10 years as a Technical Writer. I would recommend it above all of the other options because it's easy, it's inexpensive, and it allows you to create highly dynamic documentation for any audience, consumed on any medium.

**JOHN MOORE** | Lead Technical Writer, Extreme Networks

## Flexible And Future-Proof

Flare is built on open standards with support for XML, CSS, and HTML, all designed to keep your content completely open, transparent, and accessible.

### With Flare, you will never be locked into a proprietary system:

#### Open Architecture

All Flare files are separate XHTML, XML, or CSS documents—topics, TOCs, browse sequences, targets, skins, snippets, glossaries, destinations, condition tag sets, variable sets, and more—meaning they can be opened in any editor, including Notepad. Files and topics can even be programmatically created outside of Flare and copied into the Flare project structure to be used instantly by Flare.

#### Standard XHTML Content with W3C Schema Compliance

Flare content conforms to industry standard schema requirements from the World Wide Web Consortium (W3C). Flare's code adheres to the W3C XHTML Schema specification, making it easy to integrate with other XML or XHTML applications.

# madcap<sup>®</sup> CENTRAL

## Why MadCap Central?

A secure cloud-based platform for editing, publishing, project and content management allows you to host content, schedule builds, review content, manage projects and tasks, view reports and more.

[LEARN MORE →](#)

Finally, MadCap Central is out with its new review function. The cloud-based editor will make the interaction with Flare a sharp and worthy contestant to web CMS systems. Thank you MadCap Software!

**THOMAS BRO-RASMUSSEN** | Owner, Lokomatik

## Secure Cloud-based Publishing, Project and Content Management

### WHAT?

Access and share content across projects and users to simplify content management and development – all in a secure cloud-based environment.

### WHY?

- » Manage projects in the cloud
- » Simplify your hosting and reduce IT resource dependency
- » Gain greater insight into project status and health
- » Improve collaboration
- » Eliminate non-integrated project management tools
- » Schedule and automate publishing tasks

# Streamlined Contribution and Review

## WHAT?

Allow anyone in your organization to contribute and review Flare content using MadCap Central's cloud-based editor.

## WHY?

- » Cloud-based editor doesn't require users to setup or install any software
- » Concurrent multi-user authoring and review keeps content review efficient
- » Easy-to-use interface for all users
- » Simplified team collaboration for content creation

I have used other source control systems with Flare, and they have each had their challenges. The MadCap Central solution is so easy and works so well – I think it's a no-brainer!

**KATE MONTRESSOR** | Senior Technical Writer, SilverPeak, Inc.

# One Centralized Location to Manage Projects and Content

## WHAT?

With the extensive project and content management capabilities, you can upload projects, import projects from other users, assign users to specific projects, set project statuses, receive notifications for activities and much more, all from a single location.

## WHY?

- » Upload MadCap Flare projects for easy source control
- » Import Flare projects from other teams or users
- » Assign users to projects
- » Set and manage status of projects
- » Monitor projects with the Project Dashboard
- » Get notifications on projects via email, Slack or within Central

## ROI SUCCESS STORIES

# Maximize Your Return On Investment

### Increased Production Speed
