Intelligent Content Authoring and Publishing

Flare's modern user interface comes packed with features, including a patented XML Editor. A completely customizable interface makes authoring personalized and efficient.

- **RIBBON TOOLBAR FOR EASY ACCESS TO COMMON TASKS**
  The toolbar makes it easy to access and view common tasks. You can also create your own customized quick access toolbar and keyboard shortcuts.

- **CONTENT EXPLORER**
  One of the most-used elements in the Flare interface, the Content Explorer is used to hold all of the content-related items in your project.

- **PROJECT ORGANIZER**
  Another frequently used element in the Flare interface, the Project Organizer is used to hold all of the project-related items in your project.

- **VISUAL EDITOR WITH PATENTED STRUCTURE BARS**
  Author content using the built-in “What-You-See-Is-What-You-Get” (WYSIWYG) XML Editor, with print, web, tablet and mobile layout modes. Additionally, the patented Structure Bar technology allows you to easily manipulate and see a visual representation of your content structure without having to view the underlying XML.

- **REAL-TIME SPLIT VIEW EDITOR WITH XML CODE VIEW**
  A synchronized split view shows both the XML Editor and the Text Editor in real time, with horizontal and vertical orientation options, auto complete and code validation with syntax coloring.

- **DOCK ANY WINDOW PANE FOR QUICK ACCESS**
  A Style Inspector in the Formatting window pane lets you view and edit the style details for your content (topics, snippets, etc.) in real time, rather than having to edit styles in the stylesheet. Window panes can be docked, floated or hidden.
Cloud-based Publishing, Project and Content Management

MadCap Central’s user interface makes it easy to organize your content, projects, teams and users. Gain better insight into tasks and production schedules, work collaboratively with teams and departments, and extend the authoring capabilities of MadCap Flare with a variety of publishing, project and content management tools and features.

- **CUSTOMIZABLE DASHBOARD**
  Customize your dashboard with widgets for quick and easy access to calendars, build history, cloud storage usage, project properties and more.

- **PROJECTS**
  PROJECT MANAGEMENT, SOURCE CONTROL, HOSTING AND PUBLISHING
  The Projects page displays a grid of all the MadCap Flare projects that have been uploaded to your MadCap Central license. Use the Projects section to schedule and manage builds, create and manage project lifecycle checklists, set builds to a “Live” status to make content viewable by the public, and much more.

- **TASKS**
  TASK MANAGEMENT AND PROJECT CHECKLISTS
  The Tasks page lets you keep track of work that needs to be completed and visualize the workflow. When creating a task, you can provide various kinds of information for it, including priority, due dates, estimated hours and more.

  The Project Checklists feature allows you to create unique, customizable project milestones that can be tracked individually or as a team. Set the appropriate status on each item as you work, and keep track of the percentage of completion as you progress with a visual chart.

- **TEAMS & USERS**
  TEAM COMMUNICATION AND USER MANAGEMENT
  The Teams page can be used to organize users into groups. This provides a convenient way to associate people with projects and quickly communicate with a specific set of users. The Users page lets you manage and view all of the users on a license key.
SUBJECT MATTER EXPERT CONTRIBUTION AND REVIEW

MadCap Contributor makes it simple and easy for anyone in your organization to review and contribute content to your documentation.

- A Streamlined Workflow for Content Development
- Contribution Templates for Consistency and Defined Guidelines
- Simplified Visual Editor for Easy Editing
- Review Packages for Multiple Documents
- Free Review with Annotations
- Multiple Licensing Options to Fit Any Organization
- Free Translation Review Workflow with MadCap Lingo

We have much better management, tracking, and versioning of content now through MadCap Flare integration with Git. And MadCap Contributor makes it easy for anyone on the team to proofread and edit content once it’s in Flare.

KAREN MILLER | CMS Specialist, CCI

FIND AND FIX ISSUES WITH POWERFUL PROJECT ANALYSIS AND REPORTING

MadCap Analyzer is a powerful project analysis and reporting tool that can help find and fix issues with your Flare projects.

- Find and Fix Critical Issues Quickly
- Get Content Suggestions for Snippets, Variables and More
- Meet Accessibility Guidelines
- Generate Custom Reports
- Visualize Data with Statistical Reports
- A Valuable Tool for Everyone on Your Team

MadCap Analyzer brings another level of confidence when building our online Help, making sure everything is okay before we make it available to our users. It really gives us peace of mind.

STEFAN STEINBAUER | Head of Documentation and Translation, Tricentis

ADRIAN MORSE | Documentation Manager, Picis
**Translation and Localization**

A tightly integrated computer-aided translation (CAT) tool, MadCap Lingo is used to translate MadCap Flare project files or content from any number of applications such as MadCap Doc-To-Help, Microsoft® Word, Adobe® FrameMaker® and more.

**A Translation Workflow Management Solution for Authors and Document Managers**
- Superior Workflow and Review for Documentation Teams and Translators
- Easily Package and Send Content with Project Packager
- Ensure Project Integrity and Avoid Content or Formatting Corruption Issues
- Statistical Reports Provide Visibility into the Translation Process
- Advanced Features Such as Convert Variables to Text
- Free Translation Review Workflow with MadCap Contributor

**A Powerful CAT Tool for Translators**
- Multi-language Support
- Translation Memory Support
- Machine Translation Support including Google® Translate
- Live Preview Pane
- Robust File Support
- Terminology Management
- Quality Assurance Reports
- Support for Multiple Translation Memory Connections
- Concordance Search
- Segmentation Rules Editor
- Support for 100% Matches
- Translation Statistics
- Translation Memory Suggestions
- Termbases

After 18 months of testing, we found the translation costs for our product documentation using MadCap Lingo were reduced on average close to 50% per release, in addition to greater error reduction.

---

**Analytics, Reporting and Social Collaboration for Your Documentation**

MadCap Pulse adds analytics and reporting, ratings and social collaboration to your documentation — three components used separately or together — to provide insight into how users use and interact with your content. By leveraging these technologies, MadCap Pulse helps improve your content quality, reduce technical support calls, and enhance the end user experience.

- Gain Insight with Powerful Analytics and Reporting
- Add Topic Ratings for Feedback on Content Quality and Helpfulness
- Improve Customer Satisfaction, Foster Communication and Reduce Support Inquiries

**Let MadTranslations Manage Your Next Translation Project**

MadTranslations specializes in individual projects or complete end-to-end translation and localization services. Get a free quote on your next translation project:
- Language Translation
- Software Localization
- Website Localization
- Technical Documentation
- eLearning Localization

**MadPak Professional Suite**

A must-have for technical communicators, content developers and documentation specialists — the MadPak Professional Suite includes six fully integrated technical communication and content development tools for authoring & publishing, contribution & review, analysis & reporting, translation & localization and multimedia creation.

**Save Over 50% When You Purchase the Product Suite**

A translation workflow management solution for authors and document managers.
